TESTING in Oregon

<https://coronavirus.jhu.edu/testing/states-comparison>

Expanded Testing Capacity

Oct. 6, 2020 - Starting this week

Oregon is receiving between 60,000 to 80,000 Abbott BinaxNOW rapid point-of-care antigen tests* per week through end of year, doubling Oregon's testing capacity.

OHA also now recommends testing for anyone who has symptoms of COVID-19

regardless of severity, and all close contacts of those individuals, even if they have no symptoms.

*Rapid antigen tests have strengths and weaknesses.
